2. Please comment on specific aspects of the course that need improvement.

Although it may not have been your fault, I wish that there would have been more communication between the TA and the professor. I felt like my TA was coming into class preparing the best that he could have, but it was stressful for me because he wasn't sure what to teach.

3. If necessary clarify any of your previous responses or make additional comments.

personally, I wasn't very interested in all the explanations about ~~applied~~ applied math, but it was nice to ~~to~~ have a TA who was excited about math.
